Novice Notes

These Notes are intended to help Novice or first-time rallyists. They highlight the more important points contained in the General Instructions, but are not official for this rally (Italicized text in braces are examples).

Execute all instructions in order. Execute parts of instructions in order. Do not skip instructions.

Check off each instruction as you execute it - otherwise it is easy to loose track.

Numbers in the left column are Overall Mileages. Your odometer may not agree with the rallymaster's.

If the next instruction does not apply at an intersection, go Straight As Possible (SAP) through that intersection and keep trying to execute the instruction.

The term CAS means to Commence Average Speed. CAS 25 means to go 25 mph. (CAS 25 at "Brainbuster")

Instructions which refer to Stop signs (Left at Stop) are done only at Stop signs at which you are required to stop by law. Other signs can appear almost anywhere (street signs, billboards, etc).

The term BTZ means to <u>Begin Transit Zone</u>. There is no average speed in a Transit Zone. You are told how long you have to get to the <u>End Transit Zone</u> (ETZ) which will appear later in the instructions. Just drive at any legal speed and you should have enough time to get there.

- 57. Left at Stop. BTZ of 12.00 minutes.
 - -- Take 12 minutes to get from instruction 57 to 66
- 66. ETZ at "B.M. Vette Emporium"

Dead end roads to not exist. Private roads do not exist.

Enter an unpaved road only when specifically told to do so by an instruction using the term 'unpaved'. {Right onto unpaved}

Each instruction is executed no more than 3.00 miles after the completion of the previous instruction. This means that if you go more than 3 miles without executing an instruction, you are likely to be off course. The easiest way to keep track is to write down the <u>time</u> when you execute each instruction. If you drive more than 6 minutes at CAS 30 (or 9 minutes at CAS 20) you have passed the 3-mile limit.

If you suspect you might be off-course, go back to the last intersection where you know you were correct and continue the rally.

When you see a $\sqrt{\cdot}$ sign, you are at a checkpoint. Drive <u>past</u> the sign <u>and</u> the checkpoint crew. Then pull off the road as far to the right as is reasonable and carry your scorecard back to the crew. On your scorecard, the workers will record your arrival time at the checkpoint and assign your departure time from it.

If you find yourself irrevocably lost, consult the Pick-up Points sheet.
